

## **Heat & Extreme Weather Policy**

Future Football monitors forecast weather conditions closely and aims to give every chance for a scheduled session to proceed as planned before making a decision to cancel. Please assume sessions are running unless you are advised of a cancellation by text message.

### **Extreme Weather**

Future Football programs and coaching sessions will run as scheduled except under the following conditions:

1. Where the temperature exceeds 35 degrees Celsius
2. During thunder & lightning
3. When heavy rain has resulted in excessive surface water and it is too difficult to train

### **Heat**

In circumstances where the temperature is high (between 30 degrees and 35 degrees), training sessions will be managed appropriately with regular shade & drink breaks plus close monitoring of the health of players.

Where sessions are cancelled due to the Heat and Extreme Weather Policy, players are entitled to attend a make-up session later in the applicable term. No refunds will be given or credits towards future term payments.
